

Module 1	Module 2	Module 4	Module 5	Module 8	Module 18	Module 19	Module 22	Module 23	Module 28	Module 29
basic research	correlational study	pituitary gland	amygdala	Stages of sleep	minority influence	in-group bias	encoding	wording effects	repression	projective personality tests
biological psychology	Why scientific study?	sensory neurons	Neural impulse route	Infants and REM	social loafing	companionate love	Implicit memory	aging & encoding	Id, Ego, Superego	internal locus of control
cognitive process	naturalistic observation	epinephrine	brainstem	Sleep debt dangers	self-fulfilling prophecy	mere exposure effect	short-term memory encoding	retrieval failure	reaction formation	Big 5 Personality Inventory
cognitive psychology	Operational definition	Neuron parts	hippocampus	sleep and time change	attribution theory	superordinate goals	long-term potentiation	encoding failure	Humanistic perspective	Pessimistic Explanatory Style
Evolutionary Psychology	Confirmation Bias	Sympathetic Nervous System	cerebral cortex	consciousness	groupthink	attractiveness perceptions	serial position effect	young kids and memory accuracy	Free Association	humanistic v psychodynamic
Gestalt psychology	correlation & causation	central nervous system	Brain Scanning		conformity	Scapegoat theory	Flashbulb memories	proactive interference	Inferiority Complex	social-cognitive theory
Humanistic psychology	reasons to do experiments	neuron purpose	Broca & Wernicke's areas		foot-in-the-door phenomenon	factors of attraction	effortful processing	misinformation effect	Psychosexual development stages	learned helplessness
introspection	case study	refractory period	Phineas Gage		cognitive dissonance	discrimination	automatic processing	permanence	Fixation	
Kenneth & Mamie Clark	population	dopamine	corpus callosum		obedience	aggression and testosterone	state dependent memory	Ebbinghaus Curve	Maslow	
Martin Seligman	random sampling	autonomic nervous system	split-brain processing			Equity	chunking		displacement	
Psychology	longitudinal study		frontal lobe			passionate love	recognition		criticism of Freud	
Structuralism			parietal lobe			TV violence and aggression	echoic memory		regression	
William James						perceptions of happiness
